## **News Release**

*For Immediate Release*

**Contact:** Chief Bill Roth  
**Contact Info:** 712-0652 Cell  
244-1476 Office  
**Date:** 6-10-09  
**Address:** 2230 River Road

On June 10, 11, & 12, Suncor and the Grand Junction Fire Department along with other local agencies will be conducting joint training at the Suncor site on 2230 Railroad Avenue. Training activities will include a tour and informational training on the fire protection equipment at the 3.25 million gallon fuel storage and distribution site. There will be two classes per day and will include flammable liquid pit fires at the end of each session. The crews will extinguish the fires with foam provided by Suncor. Suncor is replacing their 4,000 gallons of foam concentrate with a new type of foam designed to extinguish fires in ethanol enhanced fuels. This is an economical training opportunity that will enhance the capabilities of all agencies.

The media is invited at 2:00 PM on June 10 and will have the opportunity to get visual images and interviews with Terminal Manager Douglas Pumphrey of Suncor Energy (U.S.A.) Incorporated and Operations Chief Bill Roth of Grand Junction Fire Department.
