

The MacIntosh MapGuide installation requires a user installation. You can use the link located on the GIS Main page which looks like this

**autodesk\*** Netscape 4.7x and Mac users must download [Autodesk MapGuide version 6.5 Viewer Plugin](#).

After clicking the link you will see the AutoDesk MapGuide download page which offers several choices.

## Autodesk MapGuide

### Download

Autodesk MapGuide® Viewer is available for Windows, Macintosh and Unix platforms running Microsoft Internet Explorer and Netscape browsers. Please download the appropriate version for your system.

#### Platform: Microsoft Windows

Browser: Microsoft Internet Explorer

- [ActiveX Control](#)
- [ActiveX CAB File](#)
- [Java Edition](#)

Browser: Netscape Navigator

- [Plug-In](#)
- [Java Edition](#)

Browser: Other

- [Java Edition](#)

#### Platform: Mac OS X, Solaris, Other

Browser: All

- [Java Edition](#)

Click this link for Java Edition

This will take you to the next page which looks like this

# Autodesk MapGuide

## Java Edition

### Download the Autodesk MapGuide Viewer

Platform: Windows 98/2000/NT/XP; Mac OS X; Solaris; Other

Browser: All

- [English](#)
- [French](#)
- [German](#)
- [Italian](#)
- [Japanese](#)

Select the language of your choice, probably English.

The next page will be similar to what is shown below.

## Install Autodesk MapGuide Viewer, Java Edition Release 6.5

---

**Warning:** If an older version of Autodesk MapGuide® Viewer, Java™ Edition is installed on your computer, you must [uninstall](#) it before installing this release.

### Installing Autodesk MapGuide Viewer, Java Edition

If you do not know your configuration, click the following link to detect your configuration and download the appropriate installer:

- [Automatic Installer](#)

If you know your configuration, you can click one of the following links to download the installer for your configuration:

- [Netscape® Navigator®/Communicator for Windows® 98 SE/2000 Professional/NT 4.0 \(Service Pack 6a\)/XP Professional](#)
- [Netscape Navigator/Communicator for Solaris™](#)
- [Internet Explorer for Windows 98 SE/2000 Professional/NT 4.0 \(Service Pack 6a\)/XP Professional](#)
- [Internet Explorer with Java Plug-In for Windows 98 SE/2000 Professional/NT 4.0 \(Service Pack 6a\)/XP Professional](#)
- [Internet Explorer with Java Plug-In for Mac® OS X version 10.2.8](#)

If you prefer to download the program manually instead of using one of these installers, click [here](#)  
(not available for Internet Explorer for Windows with no Java Plugin--use the [installer](#) instead).

### Automatic Installer

Your computer's platform is not supported.

Select

- [Internet Explorer with Java Plug-In for Mac® OS X version 10.2.8](#)

The Internet Explorer with Java Plug-In will work for both Safari and FireFox browser's on the Mac.

Download the mgjava.jar file to the Library/Java/Extensions folder. Extract the mgjava at this location.

Go to this Link

<http://usa.autodesk.com/adsk/servlet/index?siteID=123112&id=5303526>

Select from the bottom of the list

## **Platform: Mac OS X, Solaris, Other**

Browser: All

- [Java Edition](#)

click the Java edition link, then click the English link

**THE AUTOMATIC INSTALLERS WILL NOT WORK, YOU NEED TO SELECT THE MANUAL INSTALL FROM NEAR THE BOTTOM OF THE LIST as shown below**

If you prefer to download the program manually instead of using one of these installers, click [here](#) (not available for Internet Explorer for Windows with no Java Plugin--use the [installer](#) instead).

After it is downloaded, restart the browser and go to this link for the maps, and click on the Macintosh user's map
