SECTION 100 – INTRODUCTION

101 GENERAL INDEX..... 101

102 PURPOSE AND INTENT..... 101

103 AMENDMENTS TO THIS MANUAL 101

 103.1 Mesa County 101

 103.2 City of Grand Junction..... 102

 103.3 Other Jurisdictions..... 102

104 PURCHASE OF A COPY OF THIS MANUAL 102

105 ACKNOWLEDGEMENT 102

106 UPDATING AND REVISIONS 103

SECTION 200 – GENERAL PROVISIONS

201 TITLE 201

202 JURISDICTION..... 201

 202.1 Mesa County 201

 202.2 City of Grand Junction..... 201

 202.3 Other Jurisdictions..... 201

203 ADOPTION AUTHORITY 201

 203.1 Municipality..... 201

 203.2 County 202

204 ENFORCEMENT RESPONSIBILITY..... 203

 204.1 Mesa County 203

 204.2 City of Grand Junction..... 203

 204.3 Other Jurisdictions..... 203

205 REVIEW AND ACCEPTANCE..... 203

 205.1 Mesa County 203

 205.2 City of Grand Junction..... 203

 205.3 Other Jurisdictions..... 204

206 INTERPRETATION 204

207 DEVIATION/VARIANCE PROCEDURES..... 204

 207.1 Mesa County 204

 207.2 City of Grand Junction..... 205

 207.3 Other Jurisdictions..... 205

208 ACRONYMS 205
 209 DEFINITIONS 206

SECTION 400 – DRAINAGE POLICY

401 INTRODUCTION 402
 402 BASIC PRINCIPLES 402

402.1	Jurisdictional Cooperation	402
402.2	Drainage Planning and Required Space	402
402.3	Multi-Purpose Resource	402
402.4	Water Rights.....	403
402.5	Drainage Analysis Tributary Area	403
403	REGIONAL AND LOCAL PLANNING.....	403
403.1	Reasonable Use Rule.....	403
403.2	Regional Master Planning	403
403.3	Drainage Improvements	403
403.3.1	Outfall Drainage System	404
403.3.2	Major Drainage System.....	404
403.4	Drainage Fee Calculation	405
403.5	Proposed Drainage Improvements	405
403.6	Floodplain Management	405
403.7	Storm Runoff Detention	405
403.7.1	Detention Requirements	405
403.7.2	Detention Exemption.....	406
403.8	Storm Runoff Retention	406
403.9	Stormwater Quality.....	407
403.10	Drainage Facilities Maintenance	407
403.11	Watershed Transfer of Storm Runoff.....	408
404	TECHNICAL CRITERIA.....	409
404.1	Stormwater Management Technology.....	409
404.2	Design Storm Events.....	409
404.3	Storm Runoff Determination	411
404.4	Streets.....	411
404.5	Flood Proofing	411
404.6	Alluvial Fans	411
405	IRRIGATION FACILITIES.....	412
405.1	Watershed Analysis.....	412
405.2	Discharge to Irrigation Conveyance Facility	412
405.3	Irrigation Reservoirs	412
406	PRESERVATION OF NATURAL DRAINAGEWAYS.....	413

SECTION 500 – RESERVED

SECTION 600 – RAINFALL

601 INTRODUCTION 601
 601.1 Data Sources..... 601
 601.2 Comparison to NOAA Atlas 14..... 602
 602 RAINFALL ANALYSIS 602
 602.1 Rainfall Depth - Duration - Frequency 602
 602.2 Rainfall Depths for Durations from 1- to 6-Hours and Less Than 1 Hour 604
 602.3 Mean Annual Precipitation and Storm Events 605
 603 DEPTH-AREA REDUCTION FACTORS 605
 604 INTENSITY-DURATION-FREQUENCY CURVES FOR RATIONAL METHOD..... 606
 605 DESIGN STORMS..... 606

SECTION 700 – STORM RUNOFF

701 INTRODUCTION 702
 702 WATERSHED CHARACTERISTICS 702
 702.1 Physical Features 702
 702.2 Watershed Imperviousness 702
 703 TIME OF CONCENTRATION..... 703
 703.1 Non-Urbanized Watersheds 703
 703.2 Urbanized Watersheds 705
 704 PRECIPITATION LOSSES..... 705
 704.1 SCS Curve Number Method 706
 704.2 CN Determination 706
 704.3 Green and Ampt Method 707
 704.3.1 Soil Hydraulic Conductivity 708
 704.3.2 Volumetric Soil Moisture Deficit..... 709
 704.3.3 Wetting Front Capillary Action..... 709
 705 RATIONAL FORMULA METHOD 709
 705.1 Methodology 710
 705.2 Assumptions 710
 705.3 Limitations on Methodology 710
 705.4 Rainfall Intensity 711
 705.5 Runoff Coefficient 711
 705.6 Application of the Rational Formula Method 712
 705.7 Major Storm Analysis..... 712
 706 SCS UNIT HYDROGRAPH METHOD 712

706.1	Methodology.....	712
706.2	Assumptions.....	713
706.3	Lag Time	713
706.4	Roughness Factor	714
706.5	Unit Storm Duration.....	714
706.6	Sub-watershed Sizing.....	715
707	CHANNEL ROUTING OF HYDROGRAPHS	715
707.1	Muskingum Method	715
707.2	Kinematic Wave Method.....	717
707.3	Muskingum-Cunge Method	717
708	RESERVOIR ROUTING OF HYDROGRAPHS	718

SECTION 800 – OPEN CHANNELS

801	INTRODUCTION	805
802	PARAMETERS AND TERMS COMMONLY USED IN OPEN CHANNEL ANALYSIS AND DESIGN	805
803	GENERAL OPEN CHANNEL FLOW	806
803.1	Uniform Flow Computation	807
803.1.1	Gradually Varying Flow	808
803.1.1.1	Direct-Step Method	808
803.1.1.2	Standard-Step Method	808
803.1.2	Rapidly Varying Flow.....	808
803.2	Critical Flow Computation.....	809
803.3	Design Procedures – Subcritical Flow	810
803.3.1	Transitions.....	810
803.3.2	Contractions	810
803.3.3	Expansions	811
803.3.4	Transition Length.....	811
803.4	Design Procedures – Supercritical Flow.....	812
803.4.1	Transitions	812
803.4.2	Contractions	812
803.4.3	Expansions	814
803.4.4	Transition Curves	814
803.4.5	Slug Flow and Roll Waves.....	815
803.5	Design Procedures – Superelevation	815
803.6	Transitions.....	816

804	TYPES OF OPEN CHANNELS AND THEIR SELECTION.....	817
804.1	Natural Channels.....	817
804.2	Grass-lined Channels.....	817
804.3	Wetland Vegetation Bottom Channels.....	817
804.4	Concrete-lined Channels.....	817
804.5	Riprap-lined Channels.....	817
804.6	Other Lined Channels.....	817
804.7	Selection of Channel Type.....	818
805	NATURAL CHANNEL SYSTEMS.....	818
805.1	Channel Morphology.....	819
805.2	Channel Restoration.....	822
806	GENERAL DESIGN CRITERIA FOR IMPROVED OPEN CHANNELS.....	823
806.1	Channel Type Selection.....	823
806.2	Hydraulic Capacity.....	824
806.3	Manning Roughness Coefficient.....	824
806.4	Uniform Flow.....	825
806.5	Vertical and Horizontal Alignment.....	825
806.6	Maximum Permissible Velocity.....	825
806.7	Subcritical and Supercritical Flow.....	825
806.8	Freeboard.....	826
806.9	Flow Transitions.....	827
806.10	Access and Safety.....	828
	806.10.1 Access.....	828
	806.10.2 Safety.....	828
806.11	Environmental Permitting.....	829
806.12	Maintenance.....	829
807	DESIGN CRITERIA FOR NATURAL AND ALLUVIAL-BED (ERODIBLE) CHANNELS.....	829
807.1	Typical Open Channel Design Sections for Natural Channels.....	829
807.2	General Design Considerations and Evaluation Techniques for Natural Channels.....	830
807.3	Natural Unencroached Channels.....	831
807.4	Natural Encroached Channels.....	831
807.5	Bank-lined Channels.....	831
807.6	Partially Lined Channels.....	831
807.7	Bio-Engineered Channels.....	832
808	GRASS-LINED CHANNELS.....	832

808.1	Longitudinal Channel Slopes.....	832
808.2	Roughness Coefficients.....	832
808.3	Trickle and Low Flow Channels.....	832
808.3.1	Trickle Channels	833
808.3.1.1	Concrete Trickle Channel	833
808.3.1.2	Rock-Lined Trickle Channel.....	833
808.3.2	Low Flow Channels.....	833
808.4	Bottom Width.....	833
808.5	Flow Depth and Freeboard.....	834
808.6	Side Slopes	834
808.7	Grass Lining	834
808.8	Horizontal Channel Alignment and Bend Protection.....	834
808.9	Maintenance.....	835
809	WETLAND-BOTTOM CHANNEL.....	835
809.1	Longitudinal Channel Slope.....	835
809.2	Roughness Coefficients.....	835
809.3	Low-Flow and Trickle Channel	836
809.4	Bottom Width.....	836
809.5	Flow Depth and Freeboard.....	836
809.6	Side Slopes	836
809.7	Grass-Lining.....	836
809.8	Channel Bend Protection.....	837
809.9	Channel Crossings	837
809.10	Life Expectancy	837
810	DESIGN CRITERIA – RIPRAP-LINED CHANNELS.....	837
810.1	Longitudinal Channel Slope.....	837
810.2	Roughness Coefficients.....	838
810.3	Low-Flow Channel.....	838
810.4	Bottom Width.....	838
810.5	Flow Depth	838
810.6	Side Slopes	838
810.7	Toe Protection	838
810.8	Beginning and End of Riprap-Lined Channel	839
810.9	Loose Riprap Lining.....	839
810.9.1	Riprap Material.....	839
810.9.2	Bedding Requirements.....	840

810.10	Grouted Riprap-Lining	841
810.10.1	Riprap Material.....	842
810.10.2	Bedding Material.....	842
810.10.3	Cutoff Trench.....	842
810.10.4	Grout	842
810.11	Channel Bend Protection.....	842
810.12	Transition Protection.....	843
810.13	Concrete Cutoff Walls.....	843
810.14	Riprap-Lined Channels on Steep Slopes.....	843
810.14.1	Rock Size	843
810.14.2	Riprap Gradation for Steep Slopes.....	844
810.14.3	Riprap Thickness for Steep Slopes	844
810.14.4	Riprap Placement on Steep Slopes.....	844
810.14.5	Freeboard.....	844
810.14.6	Bedding Requirements on Steep Slopes.....	844
811	DESIGN CRITERIA – CONCRETE-LINED CHANNELS	844
811.1	Longitudinal Channel Slope.....	845
811.2	Roughness Coefficients.....	845
811.3	Low-Flow Channel.....	845
811.4	Bottom Width.....	845
811.5	Flow Depth	845
811.6	Side Slopes	845
811.7	Concrete-Lining Section	845
811.7.1	Thickness	845
811.7.2	Concrete Joints.....	845
811.7.3	Concrete Finish	846
811.7.4	Concrete Curing	846
811.7.5	Reinforcement Steel.....	846
811.7.6	Earthwork	846
811.7.7	Bedding	847
811.7.8	Underdrain and Weepholes.....	847
811.8	Special Consideration for Supercritical Flow	847
812	DESIGN CRITERIA – OTHER CHANNEL LININGS	847
813	DESIGN STANDARDS FOR MINOR ARTIFICIAL DRAINAGEWAYS.....	848
813.1	Freeboard.....	848
813.2	Curvature (Horizontal)	848

813.3	Trickle Channel	848
814	CHANNEL APPURTENANCES.....	848
814.1	Maintenance Access Road.....	849
814.2	Safety Requirements	849
814.3	Culvert Outlet Protection	849
814.3.1	Basin Configuration	849
814.3.2	Rock Size	850
814.4	Low Flow Grade Control Structures.....	851
814.4.1	Introduction.....	851
814.4.2	Drop Structure Grade Control Structures	851
814.4.3	Control Sill Grade Control Structures	852
815	EXAMPLE APPLICATION	852
 SECTION 900 – ADDITIONAL HYDRAULIC STRUCTURES		
901	INTRODUCTION	902
902	CHANNEL DROP STRUCTURES.....	902
902.1	Grouted Sloping Boulder (GSB) Drop Structure	902
902.2	Vertical Riprap Drop Structure (Vertical Hard Drop Basin)	906
902.3	Straight Drop Spillway	909
902.4	Baffled Aprons (USBR Type IX, Baffle Chute Drop).....	910
903	ENERGY DISSIPATION STRUCTURES	913
903.1	Increased Roughness Basins.....	913
903.1.1	Riprap Basin.....	913
903.1.2	Drop Structure as an Energy Dissipator	914
903.2	Induced Hydraulic Jump Basins	914
903.2.1	CSU Rigid Boundary Basin.....	914
903.2.2	USBR Type II Basin.....	914
903.2.3	USBR Type III Basin.....	915
903.2.4	USBR Type IV Basin	915
903.2.5	SAF Stilling Basin	916
903.3	Impact Basins.....	916
903.3.1	Contra Costa Energy Dissipator	916
903.3.2	Hook-Type Energy Dissipator.....	917
903.3.3	Impact-Type Energy Dissipator (USBR Type VI).....	917
904	OVERBANK PREVENTION STRUCTURES AND WASTEWAYS	918
904.1	Side-Channel Spillways	919

904.2 Gated Turnouts.....	919
905 PIPE APPURTENANCES.....	919
905.1 Pipe Collars	920
905.2 Thrust Blocks at Pipe Bends	921
905.3 Valves.....	922
905.3.1 Drain (Blow-Off) Valves	922
905.3.2 Pressure Relief Valves	923
905.3.3 Air Inlet Valves.....	923

SECTION 1000 – STORM DRAIN SYSTEMS

1001 INTRODUCTION	1002
1002 STORM DRAIN DESIGN CRITERIA	1002
1002.1 Allowable Capacity	1002
1002.2 Allowable Velocity	1003
1002.3 Pipe Roughness	1003
1002.4 System Layout.....	1003
1002.4.1 Vertical Alignment.....	1004
1002.4.2 Horizontal Alignment	1004
1002.4.3 Utility Clearances.....	1005
1002.4.4 Manholes	1005
1003 STORM DRAIN HYDRAULICS.....	1006
1003.1 Gravity Flow Analysis	1006
1003.2 Pressure Flow Analysis	1008
1003.2.1 Pipe Friction Losses	1010
1003.2.2 Manhole Junction Losses	1010
1003.2.3 Minor Pipe Losses	1013
1003.3 Computer Hydraulic Modeling.....	1016
1004 CONSTRUCTION STANDARDS.....	1016
1004.1 Storm Drain Pipe	1017
1004.1.1 Minimum Size	1017
1004.1.2 Maximum Size	1017
1004.1.3 Pipe Material and Shape	1017
1004.1.4 Joint Fillers, Sealants, and Gaskets	1017
1004.1.5 Backfill Loading	1017
1004.1.6 Pipe Bedding	1017
1004.2 Manholes	1018

1004.3 Inlets	1018
1004.4 Outlets	1018
1005 STORM DRAIN SYSTEM DESIGN	1018
1005.1 Initial Storm Drain Design	1018
1005.2 Preliminary/Final Storm Drain Design	1019
1005.3 Example Design Application	1020

SECTION 1100 – STREETS

1101 INTRODUCTION	1102
1102 STREETS AS PART OF THE DRAINAGE SYSTEM	1102
1103 DRAINAGE IMPACTS ON TRAFFIC AND STREETS.....	1102
1103.1 Sheet Flow	1102
1103.2 Gutter Flow.....	1103
1103.3 Temporary Ponding and Localized Cross Flow	1103
1103.4 Pavement Deterioration Effects.....	1104
1103.5 Sedimentation and Debris.....	1104
1104 STREET CLASSIFICATION AND ALLOWABLE FLOW DEPTH AND VELOCITIES...	1105
1105 STREET HYDRAULIC CAPACITY EVALUATION	1106
1106 STORM INLET SELECTION, SIZING, AND LOCATION.....	1108
1106.1 Hydraulic Capacity of Inlets on a Continuous Grade	1109
1106.1.1 Grate Inlets.....	1110
1106.1.2 Curb-Opening Inlets	1112
1106.1.3 Combination Inlets.....	1113
1106.1.4 Slotted Drain Inlets	1113
1106.2 Hydraulic Capacity of Inlets in Sump Conditions	1113
1106.3 Inlet Clogging Considerations.....	1115
1106.4 Grate Selection and Rating	1117
1106.5 Inlet Location and Spacing.....	1117

SECTION 1200 – CULVERTS AND BRIDGES

1201 INTRODUCTION	1202
1202 CULVERT HYDRAULICS	1202
1202.1 Required Design Information.....	1203
1202.1.1 Discharge	1203
1202.1.2 Headwater	1203
1202.1.3 Tailwater	1203

1202.1.4 Outlet Velocity	1204
1202.2 Inlet Control	1204
1202.3 Outlet Control	1205
1203 CULVERT SIZING AND DESIGN.....	1206
1203.1 Size and Material.....	1206
1203.2 Location.....	1206
1203.3 Culvert Design Form.....	1207
1203.4 Inlet Control Calculation	1207
1203.5 Outlet Control Calculation.....	1208
1203.6 Evaluation of Results.....	1210
1203.7 Outlet Velocity Calculation.....	1210
1203.8 Computer Applications	1211
1203.9 Outlet Protection.....	1211
1203.10 Trash/Safety Racks	1212
1204 CULVERT INLETS	1213
1204.1 Projecting Inlets.....	1213
1204.2 Inlets with Headwalls	1213
1204.3 Tapered Inlets	1214
1205 BRIDGE HYDRAULICS.....	1214
1205.1 Hydraulic Analysis	1214
1205.2 Expression of Backwater	1214
1205.3 Backwater Coefficient.....	1216
1205.4 Effect of M and Abutment Shape (Base Curves).....	1216
1205.5 Effect of Piers (Normal Crossings)	1216
1206 BRIDGE SIZING AND DESIGN.....	1217
1206.1 Bridge Design Standards.....	1217
1206.2 Design Procedure.....	1217
1207 EXAMPLE APPLICATION	1218
1207.1 Culvert Sizing	1218

SECTION 1300 – IRRIGATION / DRAINAGE STRUCTURES

1301 INTRODUCTION	1301
1302 IRRIGATION DITCH CROSSINGS (CROSS-DRAINAGE STRUCTURES)	1301
1302.1 Inverted Siphons	1301
1302.2 Overchutes (Flumes and Pipe Overchutes).....	1306
1302.2.1 Flume Overchutes	1306

1302.2.2 Pipe Overchutes	1308
 SECTION 1400 – DETENTION AND RETENTION	
1401 INTRODUCTION	1402
1402 DETENTION VERSUS RETENTION.....	1402
1403 LOCAL AND REGIONAL DETENTION FACILITIES	1403
1403.1 Local Detention Facilities	1403
1403.1.1 Local Minor Facilities	1403
1403.1.2 Local Major Facilities	1403
1403.2 Regional Detention Facilities	1403
1404 DRAINAGE FEE IN LIEU OF DETENTION	1403
1404.1 Drainage Fee Basis	1404
1404.2 Drainage Fee Calculation	1404
1405 DETENTION FOR MANAGEMENT OF STORMWATER QUALITY	1405
1406 GENERAL DETENTION AND RETENTION CRITERIA	1405
1406.1 Design Storm Criteria	1405
1406.2 Geometric Requirements.....	1405
1406.3 Dry Basin Bottom Drainage	1406
1406.4 Accessibility and Maintenance	1406
1406.5 Calculating Storage Volume Available.....	1406
1406.6 Groundcover and Landscaping	1406
1406.7 Freeboard Requirements.....	1406
1406.8 State Engineer's Office.....	1406
1406.9 Embankment Protection	1407
1406.10 Inlet and Outlet Design	1407
1406.11 Off-Site Flows	1407
1406.11.1 Peak Storm Runoff Rates	1407
1406.11.2 Routing of Off-Site Storm Runoff	1408
1406.12 Retention	1409
1407 HYDROLOGIC DESIGN METHODS AND CRITERIA	1410
1407.1 HEC-1 Method.....	1410
1407.1.1 Detention Basin Outflow Limitations	1410
1407.1.2 Hydrologic Calculation Method	1410
1407.2 Rational Method	1411
1407.2.1 Minimum Detention Volumes.....	1411
1407.2.2 Allowable Release Rates.....	1411

1407.3 Compensating Detention Analysis.....	1412
1407.4 Over-Detention Analysis	1413
1408 HYDRAULIC DESIGN OF OUTLET WORKS.....	1413
1408.1 Weir Flow	1413
1408.2 Orifice Flow	1414
SECTION 1500 – CONSTRUCTION SITE STORMWATER RUNOFF CONTROL	
1501 INTRODUCTION	1502
1502 COLORADO DISCHARGE PERMIT	1503
1502.1 Stormwater Discharge Permit.....	1503
1502.2 Mesa County Permittees	1503
1502.3 Stormwater Management Manual	1504
1503 STANDARDS AND REQUIREMENTS	1504
1503.1 Stormwater Discharge Limitations	1504
1503.2 Acceptable BMPs	1506
1504 STORMWATER PERMIT	1507
1504.1 Mesa County	1507
1504.2 City of Grand Junction	1507
1504.3 Other Jurisdictions.....	1508
