

“MINI” GUIDE FOR RECYCLING “HARD-TO-RECYCLE” ITEMS

Welcome to Curbside Recycling Indefinitely, Inc.’s *guide to recycling “hard-to-recycle” materials—those items that typically end up in a landfill (and shouldn’t be there!)*. This is designed for the committed recycler like you who is willing to go that extra mile to recycle everything you can. With efforts like yours, we’re keeping more resources out of landfills, preventing toxins from entering our soil and groundwater, and preserving natural resources for generations to come. Some items are still “hard-to-recycle” and at this time non-recyclable. But hopefully some of these tips will help you to clean out your storage space, closets or that junk pile by the shed. *Save landfill space and do the right thing!*
