

TYPES OF MEMORIAL PROGRAMS

Memorial Tree Planting Program

This program provides trees as a Living Tribute for many generations. If you choose to take advantage of this service, a representative from the Forestry Division will contact you to finalize tree selection, location, and installation date.

PLEASE NOTE: Tree planting is focused towards a spring season (April through May) and fall season (September through October), and it takes approximately four weeks to have wood engraved maps created.

City Park Memorial Tree

A personalized wood engraved map with the location of the tree will be provided to the purchaser to capture the location of the tree, and each tree will be added into the City's inventory data base.

Example of wood engraved map with the location of tree placement. Stone markers are no longer placed at the base of trees.

Memorial Bench and Shelter Program

Memorial benches and shelters have become a popular way to remember and pay tribute to loved ones. A representative from the Parks Division will be in contact with you to finalize park location, and installation date. Currently, shipping times are long and it may take more than six weeks for the items to be delivered. Memorial plaques may be purchased separately once the bench or shelter is arranged.

You may request any City park; restrictions may apply.
